# A. S. BARNES & CO.

**Established in 1838.**

Forty-nine years in the School-book business! Almost half a century! Never more alive to the wants of the educational public than to-day! During all this time, under the same title, has been devoted to the production and improvement of elementary and high-school text-books. Charles Davies, J. Madison Watson, James Monteith, J. Dorman Steele, Stephen W. Clark, Alphonso Wood, W. G. Peck, Joseph Ficklin, C. S. Jepson, Jerome Allen, Chas. N. Cleveland, Chas. Northend, David Page, J. M. B. Sill, Edward Searing, and James H. Worman are some of the authors whose books have become famous in the hands of this firm. Recently they have been particularly successful in the presentation of some wonderfully beautiful and popular books. Notice, for instance:

Barnes's New National Readers (5 *numbers*)—"*Educational Gems of the Decade;*" Watson's New Spellers (2 *numbers*); Barnes's New Arithmetics—*a combination of Davies, Peck, Fish, and Ficklin;* Barnes's New Geography (2 *numbers*), *unsurpassed for beauty and teachableness;* Monteith's New Physical Geography—*the latest, cheapest, and best;* Barnes's Language Lessons; Barnes's School Histories (Primary, Brief, and General) *largest sale on record in* 1886; Barnes's Penmanship (Flickinger), *creating a revolution in style and price;* Ward's Letter-Writing and Business Blanks—"*a great hit;*" Barnes's Popular Drawing-Books—*a complete series by a practical teacher;* Steele's Scientific Series—*on the "fourteen weeks" plan and lately revised*—7 *volumes;* Pathfinder Series of Hygiene—*meeting the requirements of recent legislation on the subject of the effects of alcohol, tobacco, and other narcotics*—3 *volumes.*

These books have been prepared at great expense, and represent the result of all these years of experience in the line of school publication. With such books any school is admirably equipped, and it will take many years before any better set of books can be brought out. Teachers and school officers are invited to call or send for descriptive circulars. Specimen pages free. For sample copies, address the Publishers,

# TELEGRAPHIC CODE.

*There is added to the* EDUCATIONAL CATALOGUE *this year, by general request, a telegraphic code for ordering text-books, which is intended to replace the individual codes issued by publishers for their own books, and by wholesale dealers, with a uniform method for the entire trade.*

*This code is based on the name of publisher, name of author, and designation of individual book (sometimes by initials and sometimes necessarily arbitrary)—a natural system, giving more opportunity to catch possible errors than where hap-hazard words or signs are associated arbitrarily with each book. This method also allows code-signs for new books to be interpolated in future catalogues without breaking down the system.*

*Each book is designated by six letters, the first and second being the first two letters of the author's or series' name, so as to preserve an approximately alphabetical arrangement, corresponding nearly to the arrangement of the books; the third and fourth the designation of the book by that author or in that series; the fifth and sixth the abbreviation of the publisher. Thus,* Adefco *would mean Addick's Elementary French, published by Charles Collins.*

*The name of the publisher, as designated by the two letters (fifth and sixth) is placed in* SMALL CAPITALS, *so as to be readily caught by the eye. Where two or more publishers issue the same book, either separate code-words are given, or the code-word is formed by adding to the four letters the two letters designating the publisher preferred. Thus, in the case of the Standard Supplementary Readers, issued in identical editions by four houses under mutual arrangement, the first of that series would be ordered as* StsaAP, *or* StsaBA, *or* StsaIV, *or* StsaVA, *according as the dealer preferred Appletons', or Barnes', or Ivison's, or Van Antwerp's issue. If he has no choice, the sign* xx *may be used to designate any publisher; thus,* Stsaxx *would mean Standard Supplementary 1st Reader, any edition.*

*In writing a despatch treat the small capitals as ordinary lower-case letters, using a capital only at the beginning of each code-word to separate it from the previous code-word.*

*In the case of a series, as Rightmyer's Penmanship, having but one code-sign, the first, second, etc., of a series may be ordered by affixing to the six letters a seventh, or seventh and eighth, designating the ordinal numbers, to wit:* m-1st, n-2d, o-3d, p-4th, q-5th, r-6th, s-7th, t-8th, u-9th, v-10 or o. *Thus,* RipeBEm *would order Rightmyer's Penmanship, no.* 1; RipeBEq, *same, no.* 5; RipeBEv, *same, no.* 10; RipeBEmo, *same, no.* 13. *In the case of special State editions of geographies, etc., the name of the State must be* added *as a separate word.*

*The number ordered is designated by the last letters of the code-word, to wit:* a-1, b-2, c-3, d-4, e-5, f-6, g-7, h-8, i-9, j-0, k-00, l-000. *Thus, six letters only mean one copy;* b *as a last letter means* 2 *copies;* ab, 12 *copies;* bj, 20 *copies;* ak, 100 *copies;* abe, 125 *copies;* al, 1000 *copies.*

*In using this code, preface the despatch with the abbreviation for shipping directions, with the letters* PW *added, to wit:* Sendpw, Mailpw, Exprpw, Frgtpw, Fastpw, Boatpw, Enclpw, *mean respectively, Send in any way, Send by mail, Send by express, Send by freight, Send by fast freight, Send by boat, Enclose to usual agent—the following books, for interpretation of which see* PUBLISHERS' WEEKLY *code.*

*When a dispatch is received it is to be interpreted as follows: The first word is shipping directions. Each additional word is an order for a line of books (unless in the case of an explanatory word, like the name of a State, which* follows *the code-word of the book to which it refers). In each of those words the first and second letters are the first and second letters of the name of the author or series, under which it is alphabeted in the* EDUCATIONAL CATALOGUE. *This reduces the search to a few lines, when the third and fourth letters, or the fifth and sixth letters, give an easy cue. The only difficulty will be in the case of long series like the Ahn books, where the arbitrary signs necessarily used may give some slight trouble. If there are only six letters, one copy of the book is required. Additional letters mean, if in the first part of the alphabet, the number of copies wanted; if in the last part, the number in a series which has but one code-sign.*

*Thus:* Exprpw Ahhist, Stsaxxab, Stsbbad, Ripeben, Ripebesab, Ripebemnbd, Krasapsadd, Krpsapbd, Anlkhmb, *reads,*

Express, using PUBLISHERS' WEEKLY code:

1 Ahn-Henn First French Reader, with notes, half roan.
12 Standard Supplementary Reader, No. 1, any edition.
4 " " " " 2, Barnes' edition.
1 Rightmyer's Penmanship, No. 2.
12 " " " 7.
24 " " " 12.
144 Krusi's Drawing-Books, Analytic Series, No. 7.
24 " " " Perspective Series, Nos. 9–12.
2 Keys to Andrews' Latin Exercises.

*The difficult cases above cited will not often occur, and after a little practice the code will be easily worked, either in making up or filling orders. The compiler will be greatly obliged, however, for any suggestions for correction or improvement suggested by actual use. The saving, both in cost of telegraphing and in manual labor of writing, will be found to be very considerable.*

*The growing bulk of the* EDUCATIONAL CATALOGUE *has made it impracticable to include maps, charts, dialogues, supplementary reading, individual numbers of literature series, teacher's aids or, in general, books not ordered in quantity for class use, but singly for individual use. If the demand justifies, it is proposed to issue a separate catalogue of such books, with the present code-system applied to them also.*

## A POPULAR CLASS-BOOK.

***RICHTER'S INORGANIC CHEMISTRY.*** A Text-Book for Students, by Prof. VICTOR VON RICHTER, University of Breslau. Translated by EDGAR F. SMITH, M.A., Ph.D., Professor of Chemistry in Wittenberg College, Springfield, Ohio; formerly in the laboratories of the University of Pennsylvania; Member of the Chemical Societies of Berlin and Paris, etc. Second American from the Fourth German Edition. 89 wood-cuts and colored plate of Spectra. 12mo, 400 pages, cloth, $2.00. *Examination price, postpaid,* $1.50.

In this work the theory and facts of the science are brought close together and their intimate relation clearly shown. The descriptions of the various inorganic substances are full and embody the latest results and discoveries. The periodic system of Mendelefeff and Lothar Meyer constitutes an important feature. The thermo-chemical phenomena of the various groups of elements also receive careful treatment. The book has reached five editions in both Germany and Russia and has been translated in Holland and Italy. This, the second American edition, has been recommended at a number of prominent schools and colleges throughout the country.

From F. A. GENTH, Professor of Chemistry; F. A. GENTH, Jr., Assistant Professor of Chemistry, University of Pennsylvania.—"We have examined with much care the 'Inorganic Chemistry' of Professor Victor von Richter, recently translated by Dr. E. F. Smith. Both theoretical and general chemistry are treated in such a clear and comprehensive manner that it has become one of the leading text-books for a University course in Germany. We are indebted to Dr. Smith for his translation of this excellent work, which may help to facilitate the study of chemistry in this country."

## THE BEST REFERENCE-BOOK.

***RICHTER'S CHEMISTRY OF THE CARBON COMPOUNDS,*** or Organic Chemistry. By same author and translator as above. Illustrated, 12mo, 710 pages, cloth, $3.00; leather, $3.50. *Examinatian price, postpaid,* $2.00.

This volume contains a full description of the Carbon Derivatives. The treatment of the various classes of bodies is comprehensive, the most recent and interesting results of chemical research being given with special fulness.

Excellent methods of preparing the most typical bodies will be found distributed through the entire volume. These will enable the student to acquaint himself practically with those portions of organic work which are now receiving so much attention. The reactions of the groups of compounds are complete, the methods of analysis described are the most modern and reliable, so that the volume may be depended on as a trustworthy laboratory guide.

Richter's Organic Chemistry is used as a text-book in those schools that devote the necessary time to this branch; for those, however, who must use smaller or more elementary books it will be found extremely valuable as a work of reference.

From W. H. SEAMAN, Professor of Chemistry, Howard University, Washington, D.C.—"It is undoubtedly the best text-book of its class."

From T. J. WRAMPELMEIER, Assistant Professor of Organic Chemistry and Pharmacy, University of Michigan, Ann Arbor.—"I shall recommend it to my classes as the BEST TEXT-BOOK on organic chemistry."

From J. S. SCHANCK, Princeton College, N. J.—"I consider it one of the choicest works on organic chemistry."

From Prof. F. P. VENABLE, University of North Carolina, Chapel Hill, N. C.—"The method of dividing and grouping is a great aid to the memory and to an intelligent conception of the subject."

From SAMUEL T. SADTLER, Professor of General and Organic Chemistry, University of Pennsylvania, and Professor of Chemistry, Philadelphia College of Pharmacy.—"It presents in a concise form the most modern views of the theory, and gives, moreover, many very practical methods. . . . The freshness of its information may be noted. . . . I consider it compares favorably with any book upon this subject in the English language."

# Bibliographical Publications.

## THE PUBLISHERS' WEEKLY,

Established in 1872, with which was incorporated the *American Literary Gazette and Publishers' Circular* (established in 1852), by purchase from Mr. Geo. W. Childs, is recognized as the representative of the publishing and bookselling interests in the United States.

The central feature of the paper, which makes it an indispensable aid to the trade, to librarians, and to literary people, is its *Bibliographical Department.* Every possible facility of reference is afforded by a combination of methods which records the books, by the week, the month, the season, and the year, under the author, the publisher, the title, the subject, and the class. It is acknowledged that no other journal, at home or abroad, supplies as practical and satisfactory a record of the publications of its country.

The *Literary Department* includes comprehensive intelligence as to books forthcoming and publishing movements, at home and abroad, gathered with the aid of representatives in other cities; editorial discussions on book and trade subjects, as copyright, postal questions, book production and manufacture, etc.; original contributions and representative extracts on like topics; notes on authors; journalistic notes; business notes; literary and trade notes, etc. $3.20 per year, 10 cents per number.

## THE LITERARY NEWS.

An Eclectic Review of Current Literature. Illustrated. Published monthly, and containing the freshest news concerning books and authors; lists of new publications; reviews and critical comments; characteristic extracts; sketches and anecdotes of authors; courses of reading; bibliographical references; prominent topics of the magazines; prize questions on choice books and other literary subjects, etc., etc.

The *Literary News*, since its establishment under the name of *The Literary Bulletin*, in 1868, has passed through many transformations in appearance and method before acquiring the distinctive features which have given it a character of its own, and which have become so familiar to thousands of readers. In substance it has been the same since its inception—"a monthly record of current literature;" but while primarily fulfilling its mission in the interests of the book-trade, it has since the establishment of the PUBLISHERS' WEEKLY, which now so thoroughly covers that ground, aimed more directly to meet the wants of readers and students.

In its 32 pages monthly, it aims to give readers, in the briefest possible space, and in the shortest possible time, the widest possible information about all the new books. It is illustrated with portraits of authors, *fac-similes* of manuscripts, and pictures from the newest illustrated books. A complete index, by authors, titles, or subjects, makes the annual volumes accessible for permanent reference. $1 per year.

## THE LIBRARY JOURNAL.

Official Organ of the American Library Association. Edited by CHARLES A. CUTTER, Librarian Boston Athenæum, and R. R. BOWKER.

*The Library Journal* was established in 1876 by the coöperative efforts of the leading librarians on both sides of the Atlantic. Its chief object is to be a practical help to the every-day administration of both large and small libraries, and to effect a saving by enabling library work to be done in the best way, at the lowest cost. The *Journal* especially meets the needs of the smaller libraries, offering them the costly experience and practical advice of the largest. In refraining from doing imperfectly what is done so well by the several journals specially devoted to antiquarian or purely historical interests, the *Library Journal* is enabled to give its chief attention to modern bibliography and current library matters, as represented particularly in its departments of "Bibliography" (proper), "Library Economy and History," "Catalogs and Cataloging," "Anonyms, Pseudonyms, etc.," and "Librarians." Published monthly, $5 per year; 50 cents per number. *The Literary News* (monthly) and *Index to Periodicals* (quarterly) are included in this price as supplements.

The above are the initial volumes of a new Series of School and College Text-books, prepared by direction of the Rev. Provincial of the Jesuits in New York and Maryland. While intended to supply the wants of the Schools and Colleges under the direction of the Jesuit Fathers throughout the Eastern and Middle States, they will doubtless be received with great favor in many other places, for in no other text-books of their size can be found a richer collection of the choice thoughts of the master-minds of English literature, from the days of Chaucer to our own time.

***A Primer for Use in Schools and Families for Teaching Correct and Distinct Articulation in Reading and Speaking.*** By C. W. KNUDSEN 89 pp., 16mo, boards, 25c.

The author aims to teach reading rapidly by a phonetic system which pays special regard to the correct pronunciation and clear utterance of the pupils. He claims that the alphabet used is easily learned, and that the rules for spelling according to pronunciation have been formed so as to retain the ordinary spelling in as many words as possible, so that when pupils are promoted to ordinary books they very easily learn to read them.

***A Pronouncing and Spelling Dictionary of the English Language.*** The words alphabetically arranged according to Noah Webster's pronunciation; for schools and families. By C. W. KNUDSEN and others. 402 pp., 16mo, cl., $1.00.
